

MORE THAN JUST FINANCING

Life is complicated, but luckily maintaining your fleet doesn't have to be. Through our standard **maintenance package**, we take care of the hassles throughout the lease term: from ordering and inspecting the vehicle, ongoing upkeep, until sale. As repair and maintenance costs are already included in your monthly rent, there are also **no unexpected costs** from accidents or breakdowns.

CONSIDERABLE SAVINGS

Beyond convenience, operating leases also save you money via greater **capital efficiency and tax savings**. With ORIX you also benefit from our scale of 12,000+ vehicles in Thailand which allow us to negotiate competitive prices for vehicle purchases, insurance, and maintenance

Lower monthly payments

For operating leases, we factor a residual value at the end of the financing term. This means you pay (up to 40%) less each month versus hire purchase financing.

Save on taxes

For high value vehicles*, you can expense more from leasing than you can from hire purchase/cash purchase. This means up to 232,000 Baht tax savings over a five-year lease.

Leverage ORIX negotiating power

We use our negotiating power to help you save on vehicle purchase, insurance, and maintenance costs. On average, customers save 5-6% more over the entire vehicle lifetime.

FLEXIBLE TERMS

Like people, no business is the same. As such, our flexible terms allow you customize a lease that **best fits your requirements**

Term

- 12 months
- 24 months
